Dear Sir

I am looking for a two month training in your company this summer to enrich my experience and knowledge in the field of networking.

As the attached resume indicates, I already did two trainings in networking, the first one allowed me to familiarize with the equipment of Cisco and the second one allowed me to configure routers and to participate in the creation of an internal networks communication.

I would really like to make use of what I have already learnt from my previous experience by working with your company. I also feel that my French education and my computer science and networking background can be helpful resolving projects I will be working on.

Please feel free to call me at (0033) 6 69529392 for further information.  
Awaiting your reply, I thank you in advance for your attention to my training request.

Yours sincerely,

Paul Sassine
